AI PRODUCTION FOR BRANDS & AGENCIES

Video ads made for your product. *Directed and reviewed by people.*

AOOI (AOOI LLC) is an AI video ad studio founded in 2023: a US-based team of ten with production support in China, working with brands and agencies across borders. We use AI to produce photoreal films faster, and every project is directed, reviewed and finished by our team: products matched to your real sample, consistent characters, and real screen UI where your product has a display.

WHAT WE MAKE

Product films

Hero films for launches, listings and websites. Materials, design and features shown clearly, with the product matched to your photos or sample.

Lifestyle ads

Your product in a world that fits your brand: lifelike characters, real-world places, natural use. Built for brand channels and paid media.

Social cuts

Short, hook-first edits for TikTok, Reels and Shorts, delivered in the aspect ratios each placement needs.

Character & narrative

Story-led spots with photoreal characters who stay consistent from scene to scene, and a cinematic look.
